POLLUTION INCIDENT RESPONSE MANAGEMENT PLAN

Koowong and Rockwood Quarries

HAZARD	RISK	AMOUNT	CONTROL
Fuel spill	Low	200L	Sand and spill kit
Oil spill	Low	100L	Sand and spill kit
Fire	Low		Fire extinguishers

A. Hazards Identified

Fuel spill, oil spill, fire

B. Likelihood of hazards occurring

Low

C. Action taken to control, minimise or avoid hazard

No bulk storage of fuel on site.

Minimal storage of oil in 20L containers.

Overhead fuel storage tank decommissioned and not in use

D. Quantity and location of pollutants

Fuel – Nil Oil – 100L

Working machines contain engine and hydraulic oil.

Machines re-fuelled by mobile service truck as required

E. Safety equipment to control risk

Spill kits and sand to control fuel and oil flows.

Fire extinguishers for fire fighting.

F. Detailed description of action to be taken in the event of fuel or oil spills

1. Contain spill to the immediate area by forming an earth bund with available gravel and crushed rock.
2. Soak up any liquids using spill response kit.
3. Ensure that no fuel or oil is allowed to enter any stream or river.
4. Load any contaminated soil or material onto a truck and transport to council landfill for proper disposal.
5. Advise your supervisor or manager of the incident at the first opportunity.
6. Advise the EPA at the first opportunity.
